

COMPANY PROFILE

The only ecoactive LED screens in the world

Who we are

We are a designer and manufacturer of LED screens with a unique product in the world. Based on innovative nanotechnology, our products are eco-active, capable of reducing pollution, purifying the air and eliminating viruses and bacteria.

Our products are of the highest quality and we offer the most extensive portfolio of LED screens on the market following strict quality control processes.

Through our 375LAB division, we can carry out customized projects. Our expert engineers will design the screen that best suits the customer's needs.

375 LED in the world

Our values

01 Ecoactive Screens

375 Led offers the unique ecoactive screens: able to purify the air and kills virus and bacteria.

02 Extensive Catalogue

Our catalogue covers the most extensive range of LED screens today.

03 Quality Control

375 Led keeps the best quality process for desing, manufacturing our products. Paying attention to every part in the chain.

04 375 LAB

Focusing on innovation, 375 LAB creates the most shocking customized LED screens for special projects. Based on the client's requirements, our 375 LAB engineers will design the product tailored to the needs of the project.

05 Warranty

All of our products are designed to achieve the highest quality, reliability, stability and robustness. The result of our designs and quality controls make it possible for us to offer a 5-year guarantee for all our models.

06 Experience

Our screens are found all over the world, and we have spectacular installations in all sectors: retail, DOOH, Control Room, Corporate, Sport Arena, Transportation, TV studio, Façades, Malls, Museums, Auditoriums, Pavilions, Meeting rooms, Shop Windows.

375 LED is a LED manufacturing company with a singular, unique, and remarkable product: the first ecoactive LED screens.

We use the last technologies to transform the space in a new way of communication and expression between brands and public; working on a sustainable way with environment.

375 LED screens are manufactured with a special finished treatment based on nanotechnology.

The Surface of our ecology screens range is covered by a titanium dioxide (Tio2) nanoparticles layer, that has a chemical reaction when the natural light hit over there. The light produces a photocatalytic reaction that gives the screen unique functionalities.

Advantages of 375LED ecoactive screens:

Purify the air

according to ISO 22197 certification
NOx abatement from Fraunhofer University

Antibacterial

eliminates viruses and bacterias, such as e-coli, Sars COV-2

Self-cleaning

The need of cleaning is 4 times less with this nanotechnology applied

ISO 22197 CERTIFICATION

10 m² of 375Led screen = 15 large trees

100 m² of
375Led screen
=
150 large trees

In recent test made by Fraunhofer Institute regarding the "determination of the air-cleaning performance of a photocatalytic LED screen by 375LED according to CEN/TS16980-1 with modified tests conditions (according to ISO 22197-1:2016)" conclude that 375LED exhibits an intrinsic NO photocatalytic abatement rate kR of 5,97 m/h with a total 16980-1 with modified tests conditions (according to ISO 22197-1:2016)" conclude that 375LED exhibits an intrinsic NO photocatalytic abatement rate kR of 5,97 m/h with a total. NOx conversion of 50,03 % in relation to NOx inlet concentration.

LED SOLUTIONS PORTFOLIO

Currently on the market there are many types of LED screens and multiple application scenarios. 375LED has the most extensive portfolio covering all categories of LED screens. We are in a position to recommend and offer the best solution for the conditions of a given installation.

375 LAB

375LAB is our commitment to innovation and design.

At 375LAB we carry out special commissioned projects, which generally respond to spectacular projects with a high component of design and innovation.

You just have to explain your project to us, and our engineers will make it come true. We can design and manufacture all kinds of screen:

Floor
Ceiling
Different Shapes: sphere, cube...
Modules based screen: Digital Wall
Immersive screens

CERTIFICATES

The quality is a keypoint in 375 LED delivery. Our high level engineers are focused on all quality control of our products.

Our quality assurance system cover:

- Components of the product
- Production process
- Final product test
- Aging test
- Spare parts
- Packaging

We paying attention to every part in the chain: product design, manufacturing, delivery, installation and helpdesk .Making us guarantee a stable and durable life of our products.

RoHS FCC CE

LED QUALITY

The quality of our products allows us to offer a much higher guarantee than what is offered in the market. Using the best components and the exhaustive quality control processes make 375LED screens robust, stable and with the highest availability. So Our standard warranty for all products is **5 years**.

Years of Warranty

375LED ECOACTIVE INSTALLATIONS

We have recently started the installations of the first ecoactive screens, to the full satisfaction of our customers.

375 OUT DIP HB

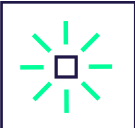

Top brightness display

DIP

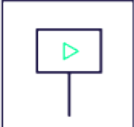

Ecoactive

High Brightness

Main Applications

DOOH

Outdoor LED screens with DIP technology that achieve brightness levels of up to 12,000 nits.

Outdoor locations with distant vision (greater than 20 m) and with maximum exposure to the sun. Due to their high brightness, they are ideal for advertising screens that require eye catcher effect like Billboards.
